#### Non-natural / Pending Manners of Death

**20%**  
DEATHS  
INVESTIGATED

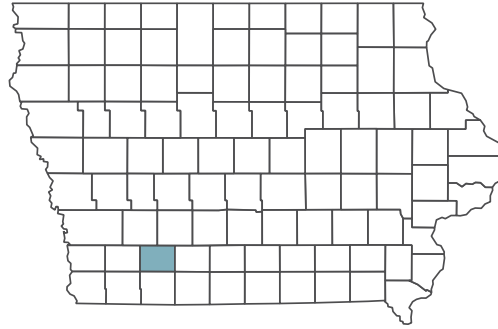

Approximately 1% of the population dies each year. The National Association of Medical Examiners requires at least **20%** of these deaths be reported to the Medical Examiner's Office for investigation. Deaths falling under the jurisdiction of the medical examiner include those that are unexpected, due to injury, or are outside the presence of a physician. A thorough medicolegal death investigation is crucial in providing closure for families, preventing future deaths, and gathering evidence for potential legal proceedings.

**8%**  
AUTOPSIES

Slightly more than **8%** of all deaths will have a forensic autopsy, which is a postmortem examination of a decedent whose death falls under the jurisdiction of the medical examiner. A forensic autopsy is a component of the medicolegal death investigation that can be utilized to identify the decedent, assist in determining the cause and manner of death, identify additional factors that contributed to death, collect evidence to be used in criminal and civil trials, identify natural diseases that may affect family members, and provide further information that can help the decedent's family process their grief.

**20%**  
DEATHS  
INVESTIGATED

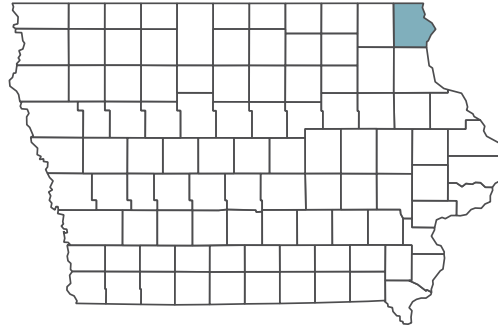

Approximately 1% of the population dies each year. The National Association of Medical Examiners requires at least **20%** of these deaths be reported to the Medical Examiner's Office for investigation. Deaths falling under the jurisdiction of the medical examiner include those that are unexpected, due to injury, or are outside the presence of a physician. A thorough medicolegal death investigation is crucial in providing closure for families, preventing future deaths, and gathering evidence for potential legal proceedings.

**8%**  
AUTOPSIES

Slightly more than **8%** of all deaths will have a forensic autopsy, which is a postmortem examination of a decedent whose death falls under the jurisdiction of the medical examiner. A forensic autopsy is a component of the medicolegal death investigation that can be utilized to identify the decedent, assist in determining the cause and manner of death, identify additional factors that contributed to death, collect evidence to be used in criminal and civil trials, identify natural diseases that may affect family members, and provide further information that can help the decedent's family process their grief.

The National Association of Medical Examiners requires at least **20%** of these deaths be reported to the Medical Examiner's Office for investigation. Deaths falling under the jurisdiction of the medical examiner include those that are unexpected, due to injury, or are outside the presence of a physician. A thorough medicolegal death investigation is crucial in providing closure for families, preventing future deaths, and gathering evidence for potential legal proceedings.

**8%**  
AUTOPSIES

Slightly more than **8%** of all deaths will have a forensic autopsy, which is a postmortem examination of a decedent whose death falls under the jurisdiction of the medical examiner. A forensic autopsy is a component of the medicolegal death investigation that can be utilized to identify the decedent, assist in determining the cause and manner of death, identify additional factors that contributed to death, collect evidence to be used in criminal and civil trials, identify natural diseases that may affect family members, and provide further information that can help the decedent's family process their grief.

**20%**  
DEATHS  
INVESTIGATED

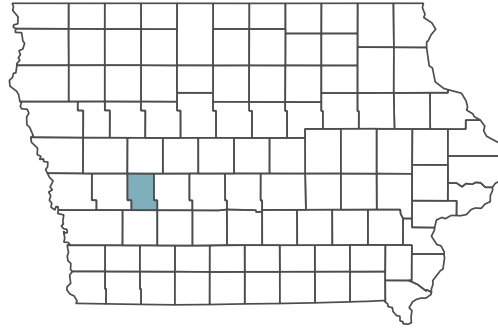

Approximately 1% of the population dies each year. The National Association of Medical Examiners requires at least **20%** of these deaths be reported to the Medical Examiner's Office for investigation. Deaths falling under the jurisdiction of the medical examiner include those that are unexpected, due to injury, or are outside the presence of a physician. A thorough medicolegal death investigation is crucial in providing closure for families, preventing future deaths, and gathering evidence for potential legal proceedings.

**8%**  
AUTOPSIES

Slightly more than **8%** of all deaths will have a forensic autopsy, which is a postmortem examination of a decedent whose death falls under the jurisdiction of the medical examiner. A forensic autopsy is a component of the medicolegal death investigation that can be utilized to identify the decedent, assist in determining the cause and manner of death, identify additional factors that contributed to death, collect evidence to be used in criminal and civil trials, identify natural diseases that may affect family members, and provide further information that can help the decedent's family process their grief.

**20%**  
DEATHS  
INVESTIGATED

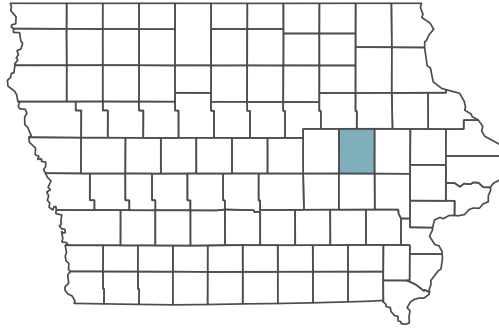

Approximately 1% of the population dies each year. The National Association of Medical Examiners requires at least **20%** of these deaths be reported to the Medical Examiner's Office for investigation. Deaths falling under the jurisdiction of the medical examiner include those that are unexpected, due to injury, or are outside the presence of a physician. A thorough medicolegal death investigation is crucial in providing closure for families, preventing future deaths, and gathering evidence for potential legal proceedings.

**8%**  
AUTOPSIES

Slightly more than **8%** of all deaths will have a forensic autopsy, which is a postmortem examination of a decedent whose death falls under the jurisdiction of the medical examiner. A forensic autopsy is a component of the medicolegal death investigation that can be utilized to identify the decedent, assist in determining the cause and manner of death, identify additional factors that contributed to death, collect evidence to be used in criminal and civil trials, identify natural diseases that may affect family members, and provide further information that can help the decedent's family process their grief.

**20%**  
DEATHS  
INVESTIGATED

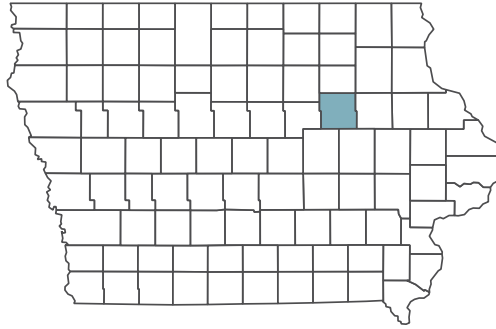

Approximately 1% of the population dies each year. The National Association of Medical Examiners requires at least **20%** of these deaths be reported to the Medical Examiner's Office for investigation. Deaths falling under the jurisdiction of the medical examiner include those that are unexpected, due to injury, or are outside the presence of a physician. A thorough medicolegal death investigation is crucial in providing closure for families, preventing future deaths, and gathering evidence for potential legal proceedings.
